WHAT KIND OF SUPPORT AND FACILITIES CAN YOU EXPECT?

Personal Care Plan:

Your needs will be fully assessed by the home manager and your social worker prior to your admission to help us identify your individual requirements and specific needs and to ensure that we are in a position to meet them fully. We will find out about your preferred daily routine, likes and dislikes, your tastes in relation to food and other special dietary requirements if you have. We will also find out about your social, domestic, religious and cultural needs, entertainment activities and establish how you would like to have your intimate personal care delivered. Your social worker and care co-ordinator will provide us with a full Community Care Assessment with their expectations of the level of support that is to be provided by the home.

Based on your identified needs we will prepare with you and your approval and the participation of other people involved in your care, a personal care plan (person centred) to enable the staff to support you in a consistent manner. The plan will be kept by the manager and reviewed on a regular basis to see that your care is being maintained. It will be available for inspection to the appropriate authorised authorities should they wish to see this.

The care plan also contains a risk assessment and any risk management plan. It also includes details of health care needs, medication, GP details and any special needs required.

A pay phone is available for service users to make or receive calls from friends/relatives. If so desired the service user may at their own cost have a private telephone installed in their room.

Risk and Participation:

Where appropriate we will carry out a full risk assessment to protect you while supporting you as a resident at this home and support you to participate fully in activities of your choice. We will advise and support you to balance the element of risks against some activities that you may wish to pursue. We will not infringe on your rights in matters of your choice but, will advise you when we feel that the activity may pose too many risks and may not be appropriate for you. However, we will work with you to try to overcome or eliminate these risks / barriers so you can lead a fulfilling lifestyle of your choice.

KEY WORKER

You will be allocated a key worker within the first month of your admission. The key worker will take care of your interests and work with you to ensure you are comfortable and well cared for. The key worker will also be responsible for monitoring and reviewing your personal care plan and to prepare information for the regular reviews.

It will be the responsibility of the key worker to make sure that:

- The services users room is kept clean and tidy,
- Their clothes are individually marked (labels to be provided by service user) and are kept clean and in a suitable place.
- The service user has an adequate supply of toiletries (provided from their own resources)
